MySQL, MongoDB

Version Control:

Git, GitHub

API Development:

RESTful APIs

Interests

PHP Laravel Web Development

php, laravel, javascript, mysql

Languages

English

Proficient

Bangla

Native

I am a passionate and dedicated PHP Laravel developer with a strong background in web development. I love problem-solving and enjoy building scalable and efficient web applications. My expertise includes HTML, CSS, Bootstrap, JavaScript, PHP, Laravel, and MySQL. I have developed various projects, including a result processing system, a real-time chat application, an online MCQ exam website, and a task management system. I build projects using PHP and Laravel separately, ensuring structured and optimized code. Additionally, I am eager to continuously learn and improve my skills to stay updated with modern web technologies.
